

Public Works Lunchroom and Covered Parking Bays
Demolition and Removal

Addendum #1

Question – Will the City provide a water source for use on this project?

Answer – Yes, use of the onsite water standpipe will be permitted.

Clarification – The city will conduct a TCLP Lead Leachate analysis. Laboratory results may be delayed. As a result, it is recommended that proponents provide pricing for the disposal of both positive and negative Lead Leachate test results.

RFP Extension - Due to additional time required to price both disposal options, the city has extended the **Closing Date to April 30th, 2024, at 2pm local time.**
