

REQUEST FOR PROPOSAL
ACTIVE TRANSPORTATION PLAN
UPDATE AND EXPANSION
Addendum
January 6, 2023

1. The RFP deadline is extended until January 19, 2023, 12:00pm.
2. Could the City clarify their expectations when referring to shovel ready projects, i.e., the level of design and cost estimating required, and if survey information will be provided under a separate budget?
When referring to shovel ready projects we mean projects that are ready for a grant application; most grant applications for infrastructure projects allow for detailed design and survey work to be included in the grant request. The City is therefore looking for low class cost estimates and project feasibility and/or preliminary design renderings.
3. Are the items listed here (section 7) intended to be considerations incorporated into the updated network map and the implementation strategy (as part of the planning principles and approach for the plan)? Or are specific design recommendations for active transportation infrastructure and end of trip facilities for new developments to be identified for inclusion in the Development Servicing Bylaw? Or perhaps both?
The scope and deliverables outlined in section 7 are to be incorporated in the updated network map and implementation strategy of the Active Transportation Plan.
