August 22, 2022

Dear Recipient,

I am writing for a Variance to add a cabinet to the exterior wall of the building at 543 Reid St. As per insurance the service size was too small for the building. (supply 100amps to each suite) The service was upgraded to 400amps.

The previous service was mounted right be side the gas meter. As per Hydro specs for service size and location it has to be moved. The only place that the service would fit was the front of the building, to meet Technical Safety's and Hydro requirements.

Sincerely,

James Cherry
